5/22/72

Dear Dick,

It does seem that as soon as the seemingly certain lone nut so long beseeched does appear, doubts about that, too, become apparent, if uncertain. Like .$$$, police work (work?). But nut he is, whether or not lone.

Had to speak to CTIA today so I read that paragrpah of your 17 to Bob Smith. It appears that he has laid that Walker stuff aside. He will be in touch with you, so you should have have to trouble the belly full of trout.

Howard will be here some time next month. Looking forward to it.

Little else new. Recent trip successful in terms Ray defense.

I have long felt that if we had not extracted all there is in the 26, it has been years since we have been past the point where they can justify the time the quest for more requires.

Happy fishing!

Best,
